Avionics Quality Engineer (f/m)
in Bremen

Orizon GmbH is your capable partner when it comes to standing out from the crowd on the labour market. With our individual advice you will find the job that suits you best. Being among the top ten German HR service providers, our company’s range of services includes the personnel secondment and placement of both skilled workers and executives of all professional fields. Orizon's “Aviation” unit is the specialist for personnel secondment in the aerospace sector and – thanks to its excellent industry experience – offers you interesting perspectives in this field. You have an appropriate qualification and are interested in working in the aerospace sector? Or you already have gained experience in aerospace? Then, we are exactly the right partner for you.

Your responsibilities:

As an Avionics Quality Engineer (f/m) for our prestigious client in the field of aerospace industry in Bremen you will be responsible for the following tasks which will include both support to operational avionics projects and transversal activities on quality department level. Within avionics projects, you will be working in the corresponding Quality Assurance teams:

- Preparation of Electrical, Electronical, Electromechanical (EEE) related documentation in proposals and projects
- Assuring conformance of avionics documentation with applicable requirements
- Evaluation of design proposals regarding selection of EEE parts and processes –
- Supplier surveillance and acceptance activities for avionics components –
- Handling of non-conformances, alerts, warning notices and risks –
- Support to supplier and contractor audits –
- Evaluation of EEE parts and processes (usability for spaceflight) –
- Assuring the conformity of EEE parts and production, integration/verification processes

Your profile:

- University degree in Electrical Engineering, Physics or comparable
- Experience in working as a design engineer as well as experience in electrical engineering, electronics and quality management
- Experience in process and product quality management and statistics
- Quality Assurance knowledge
- Knowledge in aerospace technology and semiconductor production
- Basic knowledge in vacuum technology and in cosmic radiation related to EEE
- Capability Maturity Model Integration (CMMI) process knowledge
- Excellent skills in MS Office and SAP
- Fluent German and English, both spoken and written
