The Plot Twisters present
Screaming Fairies

*Screaming Fairies* is a completely improvised performance based on a suggestion from the audience, performed by students of the University of Bremen. Join us and indulge in an unforgettable theatrical adventure that celebrates the beauty of spontaneity and creates magic out of a seemingly ordinary situation.

The Deconstruction

The performance is based on the *Deconstruction*, an improvisational longform structure. In this structure, a long scene that explores the relationship between two characters serves as the foundation and inspires various other theatrical moments. These moments shed light on the themes and absurdities of the original base scene.

The Plot Twisters

*The Plot Twisters* are born out of a theatre workshop offered as part of the study programme *English-Speaking Cultures* in Faculty 10 at the University of Bremen.
