

Potential primary supervisors for your BMB Master thesis and defense

All principal investigators (PIs) who are actively involved in teaching by giving a course in the BMB program

Christian Arend (Neurobiochemistry)
Katrin Deinhardt (Neuroscience, Cell Biology)
Ralf Dringen (Neurobiochemistry)
Michael Friedrich (Microbial Ecophysiology)
Tilmann Harder (Marine Chemistry)
Rita Groß-Hardt (Molecular Genetics)
Jan-Hendrik Hehemann (Glykobiocchemistry)
Kathrin Maedler (Molecular Diabetology)
Uwe Nehls (Botany)
Emil Ruff (Microbiology)

Potential 2nd reviewers/examiners for your Master thesis and defense and supervisors for lab rotation

All primary supervisors (above) plus all PIs of the faculty for Biology and Chemistry of the University Bremen who have an expertise fitting to the topic of the subject or the submitted thesis.

Incomplete list of examples
Sami Hassan (Systems neurobiology)
Susan Köppen (Biomolecular Modelling)
Ekkehard Küstermann (In vivo MRI)
Greta Reintjes (Mikroben-Kohlenhydrat-Interaktionen)
Christina Roggatz Dynamic Ecological Chemistry
Julia Veith (Molecular Neurobiology)
Manfred Radmacher (Biophysics)
Mario Waespy (Glycobiochemistry)

Dorothea Brüggemann (nanoBiomaterials, HSB)
Ingo Grunwald (Proteomics, HSB)
