

Study Plan - Master Industrial Mathematics and Data Analysis^{*} (Focus on Data Analysis)

Sem.	Foundations		Area of Specialization	Extension		Compulsory Elective Modules	Application Subject
1	Numerical Methods for Partial Differential Equations 9 CP	Mathematical Methods for Data Analysis and Image Processing 9 CP	Special Topics Data Analysis A 9 CP			Advanced Communications Data Analysis 9 CP (2 x 4,5 CP) or Special Topics Data Analysis C 9 CP	Modules from one Application Subject 12 CP
2	Modeling Project 15 CP (6 CP + 9 CP)		Special Topics Data Analysis B 9 CP	Special Topics Industrial Mathematics A 9 CP	Advanced Communications Industrial Mathematics 9 CP (2 x 4,5 CP)		
3							
4			Master Thesis 30 CP				

Credit Points (in short: CP) indicate the average workload for a course or module, where 1 CP = 30 hours

^{*} study program starts winter semester 2022/23 – Information provided without guarantee
