Afternoon
Jury, Awards ceremony & Cocktail
Participants pitch their projects to the jury locally, a winning team is designated.

November 6th
Final European Jury
Online pitch of the projects and selection of the winning team.
The 3 challenges

Activating knowledge for companies and their advisors
Law, tax and regulations knowledge are the essential components of the Lefebvre Sarrut DNA – Matched with Generative AI it can provide even more added value to companies and businesses. With this challenge we’re looking for new ways to make knowledge easy to implement in every professional’s daily routine.

Revolutionizing legal writing
Lefebvre Sarrut’s core activities are about understanding and sharing legal knowledge. Our writers, like other legal professionals, are expected to analyze content and share it with accuracy and efficiency under various formats. With this challenge we’re looking for ways to empower them with AI and boost their writing activities.

Improving access to justice
Law is an essential component of people’s life, but it seems very hard to apprehend and access. With this challenge we aim at exploring how Generative AIs such as ChatGPT can help breaking down the barriers they can face.
Multi-disciplinary teams

Diverse teams
Composed of employees from the group and students (law, tech, business)

Expert mentors
To coach the teams all along the process (UX Designers, Lawyers, Tax experts, Market experts, etc.)
What’s in for...

... the students?

• Putting theory into practice
• Discovering new methodologies
• Getting familiar with AIs and their applications
• A €50 voucher for all participants
• Expanding their network and getting hired by the group
• The opportunity to win the €2500 price

... universities?

• Anchor your University in the corporate landscape and facilitate your students’ access to jobs
• Communicate about your students’ participation to the Hackathon
• Offer new learning opportunities to your students and put more practice into their curriculum
• Develop your students’ entrepreneurial spirit

The students profile

Background:
All kinds of backgrounds welcome - Legal, Tax, Data, IT, Business, Design, etc.

Level of studies:
Master’s degree or last year of Bachelor

Commitment:
Being there all three days of the Hackathon
