ENERDAY 2025 - 19th International Conference on Energy Economics and Technology

The ENERDAY 2025 - 19th International Conference on Energy Economics and Technology will take place on April 4, 2025, in Dresden, Germany. This conference will focus on the challenges and opportunities in energy systems, markets, and policies, emphasizing the integration of renewable energy and flexibility options to support decarbonization and sustainability efforts. It will bring together experts from academia, industry, and politics for knowledge sharing and collaboration.

Friday, April 4, 2025

Full-day sessions

Technische Universität Dresden, Dresden, Germany

Young Energy Economists and Engineers Seminar (YEEES)

The 35th Young Energy Economists and Engineers Seminar (YEEES) will take place in Paris, France, on June 13–14, 2025. This seminar provides Ph.D. students with an opportunity to present their working papers and receive feedback from peers and senior reviewers in a constructive environment. Each participant will both present their work and review another participant's paper, with reviews conducted by senior experts from academia and industry.

June 13–14, 2025

Full-day sessions

Paris, France

Free webinar: Costs, benefits and contractual design of 24/7 PPA

Enervis Energy Advisors GmbH is offering a free webinar on "Costs, Benefits, and Contractual Design of 24/7 Power Purchase Agreements (PPAs)". 24/7 PPAs represent a significant innovation in the energy market, ensuring every hour of electricity use is matched with carbon-free generation. This webinar will provide insights into the financial, strategic, and legal aspects of these agreements, making it a valuable session for energy buyers, suppliers, and policymakers.

Friday, February 21, 2025

10:00 - 11:00 AM

Update 2025 to the Energy Efficiency Act

Energiekonsens is hosting an online event titled "Update 2025 on the Energy Efficiency Act" to inform companies about the new Energy Efficiency Act (EnEfG) and its implications, including waste heat reporting and the implementation of energy or environmental management systems. The session will provide insights into tools for reducing energy consumption and outline the obligations and deadlines arising from the law. Participants will also receive an overview of the waste heat portal and related guidelines available since March 2024.

Thursday, February 13, 2025

09.00 - 10.30 AM

Online via Zoom

Industrial Transition Dialogue

The Industriewende-Dialog (Industrial Transition Dialogue), hosted by the Forschungsnetzwerk Industrie und Gewerbe, will take place on February 14, 2025, focusing on forming technology (Umformtechnik). This free webinar will feature expert presentations on energy- and resource-efficient forming processes in industrial applications, highlighting key findings from ongoing research projects. Participants will gain insights into innovative techniques for gear forming, lightweight structural components, and wear-free brake disc manufacturing.

Friday, February 14, 2025

10.00 - 11.10 AM

Online via Webex, no registration required

Surabhi Das Urmi
University of Bremen, Digital Media (MSc.)
surabhi@uni-bremen.de

My name is Surabhi Das Urmi, and I am currently pursuing a Master of Science in Digital Media at the University of Bremen, Germany. Along my studies, I started my journey working as a Student Assistant at BEST, where I take part in many creative and organizational activities.

In my role at BEST, I help with planning and managing events, designing newsletters and posters, and handling social media accounts. I enjoy being part of the process that brings ideas to life, whether it's through creating eye-catching designs or organizing successful events. My work allows me to combine my creativity with practical skills, which I find very exciting.

I am particularly interested in designing content that connects with people and exploring new ways to communicate through digital platforms. Being a part of BEST gives me the opportunity to grow, learn, and contribute to meaningful projects that bring people together.

We're excited to invite you to join our WhatsApp group!

This platform offers a more casual and frequent channel for interactions, enhancing our traditional email newsletter. We look forward to connecting with you in this dynamic space.
