

POSTER SESSION GUIDELINES

Presenters will engage with attendees while standing next to their posters. As attendees stroll by, they will look for topics of interest. To capture attention, presenters should offer a compelling topic and a visually appealing presentation. Organization and clarity are essential. A poster presentation should draw people's interest as they pass by and be easily reviewed to encourage one-on-one discussions with the presenters. The aim is to foster informed discussions about your research. The poster should be easily readable from 1.5 meters (4 feet). At least one author must be present during the session. If a single author represents a team, they should be prepared to answer questions about all aspects of the presentation.

Support

We will provide materials for hanging the posters (display boards, pushpins).

The deadline for submitting posters is Friday, August 28, 2026. The poster must be sent as a PDF to emac2026@uni-bremen.de. Please include a 2mm border around the poster, which will be removed during printing.

Format

There will also be other authors with their poster presentations in the gallery. You will have one poster spot available for your presentation indicated by your ID submission number. The poster format is MANDATORILY A0 (84 cm width X 120 cm height).

Other recommendations

When choosing a background to frame your visual presentation, remember that neutral or greyish colors will be easier to see than a bright color. Space your information proportionately. A suggestion is to divide your presentation either horizontally or vertically into three or four sections, and place materials within those sections. We recommend you use illustrations, schemas and graphics so that your presentation can be more attractive. Make sure to arrive at least 15 minutes before the session starts to hang your poster. You can leave the poster on the wall after the session if you want.

For any questions, please send an email to the organizers (emac2026@uni-bremen.de)
