Kommentar zur Lehrveranstaltung im SoSe 2026

Description of seminars

Veranstalter*in: Christian Katzenbach

Lecturer:

Titel (dt.):

Titel (engl.): Mentoring Colloquium for MA candidates

Beschreibung:

Description:

The aim of the colloquium is to continuously accompany the process of writing the master thesis. Within the colloquium, the MA projects are presented, existing methodological and theoretical questions are discussed and feedback is provided.

We will proceed step by step: In the first two sessions, we will get to know each other and our research interest, as well as exchange ideas about what makes a "good" topic for a Master's thesis, how to write an exposé and to structure the research process and the thesis. In the further course of the semester, the sessions serve to continuously accompany the MA projects and to provide additional feedback through "peer coaching". The colloquium is always open to questions and problems that are brought to the whole group by the participants.
