

## Job Offer

For more than 30 years, Rösler develops and distributes hardware and software to collect usage data from mobile machines, such as construction machines, industrial trucks, platforms, etc.

We are looking for a student to join our workshop team.

### Your tasks

- Commissioning and test of electronic modules
- Prototype development and test

### Your profile

You

- are pursuing a degree in electronics
- are at the beginning of your studies
- are a team player
- are open for new challenges
- have good English skills

If you are interested to work part-time during your studies and become part of our innovative team, please visit us on level 3 stand 24 at the job fair or send us your application via email.

**Starting date: immediate**
