

Data protection foundation course offer

The basics of data protection according to GDPR

Online course

Compliance with data protection in accordance with the General Data Protection Regulation (GDPR) is an important requirement for data processing in companies and other organizations and must guarantee the right of data subjects to informational self-determination. These requirements create obligations for those involved in data collection and processing, such as employees, data controllers and processors.

These responsibilities can only be fulfilled with the appropriate knowledge.

This workshop provides the necessary basics for the practical implementation of data protection in accordance to GDPR in company organizations and also at home office. Practical exercises will enable participants to work on selected data protection issues as a team.

Course content:

- Structure and content of the GDPR
- Objectives of data protection
- Data protection in company organizations and home office
- Technical and organizational measures according to GDPR
- Rights of data subjects
- Regulatory authorities

Target group:

Anyone interested in data protection with or without previous knowledge.

Date:

- Friday, 15th November 2024: 4-6.30 p.m. and
- Saturday, 16th November 2024: 10-12.30 a.m.

Participation:

The course will take place via the BigBlueButton video conferencing system, the link for participation will be sent after registration.
